I am a self-taught 36.82 years old male and have been learning and making web sites for about 20 years as a hobby.

In the beginning it was mostly graphics created in Photoshop, then I learned a some PHP and used it for functional programming. I didn't know object-oriented programming at the time.

In my last job I created a web application for the company, a document store/search and blog. This is when I learned SQL, Javascript and C#.

Created my own search engine that I eventually replaced with Apache Solr. It worked, but it wasn't any good. When I didn't do technical support I used my time to write, this is how I learned. I liked writing code better than my other job tasks.

Also wrote SQL scripts and some small software tools.

Understands computer architecture and how software works (C, C++, Stack, Heap, Memory pointers, Dynamic Linking, etc).

Played around with electronic components and a micro-controller board for a while and made a LED matrix, then I got tired of it.

I learned a lot in my last job and from the internet (Youtube, MIT Open Courseware, Microsoft Virtual Academy, Google etc)

After I lost my job I discovered cryptocurrency and Ethereum the decentralized world computer and Swarm decentralized peer-to-peer storage.

A platform for creating decentralized web applications on a blockchain. I liked the idea to be able to write a static web application that is completely in the hands of the users and is hosted on a decentralized peer-to-peer network.

I had some ideas for applications on the platform and started writing an app where users are incentivised with cryptocurrency to share audio samples and discovered it's limitations...

I'm a life long learner and have had an interest in computing since I got my first computer when I was about 16 years old.

### Experience

#### Technical Support Engineer II

Baker Hughes Incorporated.

July 2008 - Desember 2016

Responsible for Directional Drilling reporting software support and database administrator. Developer and administrator of new intranet site. Generic PC software and network support. Scripting.

#### Support

TDC AS

April 2008 - May 2008

Just registering incidents and creating tickets

#### IT Technician

Gosen Skole

April 2007 - Desember 2007

#### Assistant

Gosen Skole

April 2007 - Desember 2007

Teacher assistant and working with mentally challenged kids after school

#### IT consultant and environmental worker

Buøy Skole

April 2005 - April 2006

#### Security Guard

Falck

October 2004 - October 2004

### Skills

Javascript    Typescript

HTML5    CSS    Sass

React    Angular

GraphQL    Webpack

Babel    Gulp    JSON

C#    Photoshop    SVG

Linux    Unix    MacOS

Docker    AWS

Heroku    D3.js

jQuery    Node

Express    PHP    Git

Github    Database

OOP    Design    TCP/IP

NoSQL    Windows

WPF    .NET

MongoDB    NoSQL

Docker    Database design

Cryptocurrency

Working at ONS event in Stavanger

T-SQL Stored Procedures

## Cleaner

ISS Renhold  
November 2001 - Desember 2001

Redis    Zsh    XAML

Solidity    JSX

Powershell

## Production worker

Stjernelaks AS  
Mars 2001 - May 2001

Technical Support

Computer Networking

## Cleaner

ISS Renhold  
June 2000 - August 2000

## Hobbies

Music    Guitar    Bass

Band    Learning

## Printing

Statens Vegvesen  
June 1999 - August 1999

Cryptocurrency

## Cleaner

Stavanger Kommune  
August 1998 - August 1998

## Education

### Team Treehouse

- Current  
Full Stack Javascript

### IT Akademiet / LearnIT

August 2005 - June 2006  
IT Security / Cisco CCNA

### Stavanger Katedralskole

August 2003 - June 2004  
Mathematics and Natural Science
